PROJECTS

Online Asset Management (5p)

Project Link: <https://github.com/fieztazica/online-asset-management>

Tan Binh, HCMC

Jun 2024 - Jul 2024

- Rookie Program's simulated project.
- Fully used Azure DevOps's services for developing this project with Scrum Process.
- What I'm in charged of:
 - Setup frontend project (Next.js) with necessary packages/libraries.
 - Write database seeders.
 - Handle frontend authentication/authorization flows and frontend services.
 - Design/implement mobile responsive pages.

Rookie Store (1p)

Project Link: <https://github.com/fieztazica/rookie-store>

Tan Binh, HCMC

May 2024 - Jun 2024

- A simple functional e-commerce website while training in NashTech's Rookie Program.
- Applied modern NodeJS tech-stacks: NestJS, GraphQL, OAuth2 with Auth0, Next.js, ...
- Built NestJS GraphQL API server and MVC Backoffice/Admin Page.
- Built Next.js, NextAuth and Apollo Client Storefront.

Vair (3p)

Project Link: https://github.com/fieztazica/vair_app

Thu Duc, HCMC

Oct 2023 - Jan 2024

- Vair was planned to become a multi-platform software distribution system.
- Built the mobile client app, the developer server for uploading projects, the CMS server for authentication and manage project information.

ProfioApp (4p)

Project Link: <https://github.com/HutechCJ/ProfioApp>

Thu Duc, HCMC

Aug 2023 - Oct 2023

- The application aimed at providing efficient and professional solutions for transportation management.
- 3rd Prize in CJ OliveNetworks Vina's Code Your Future.
- Built the CMS web for application with another participant.

Playody (3p)

Project Link: <https://github.com/fieztazica/playody>

Thu Duc, HCMC

Apr 2023 - Jun 2023

- Playody is a serverless music sharing web app which allows users to upload their music and listen to it.
- Built mostly the whole webapp: music player, queue, playlist, authentication, authorization with Supabase, upload and verify music tracks, simple search.

PET PROJECTS

SupaChat (1p)

Project Link: <https://github.com/fieztazica/supachat>

Jan 2023 - Feb 2023

- A simple serverless chat application made with NextJS, Supabase and Chakra UI.
- Built the whole webapp: chat box, chat list, chat box invitations, chat box avatar and name.
